Example Statement for Adobe Connect

Our version of Adobe Connect works best with the Firefox web browser. This browser is supported on both the Mac and PC operating system.

Prior to our first class, please make sure you run the Adobe Connect Connection Test to make sure the web browser and Flash player you are using are compatible with Adobe Connect. The connection test will also ensure that the Adobe Connect add-in is installed.

If you encounter issues during the system test you can click **Send Results** to email our system administrator the results of your system test. You can also review the Known Bugs & Issues on our Adobe Connect Resource page to determine if there is a Knowledge Base article that can assist you with the issue you are encountering.

To prevent feedback, please wear a headset microphone or a pair of earbuds. Once you login to the meeting space you can run through the **Audio Setup Wizard** found under the **Meeting menu**.

For our class we will be using the following meeting space in Adobe Connect:

https://connect.clemson.edu/enter your workshop URL here

> **Commented [ML1]:** Faculty/Staff should remove this link and put their class/meeting space URL here.

1. Open your web browser and navigate to the link provided above.
2. Select Enter as a Guest
3. Enter your Full Name
4. Click Enter Room

Before our first class meeting, please review the following tutorial regarding how to attend an Adobe Connect meeting. There is also a Participating in a Connect Pro Meeting Quick Start Guide. Both of these will help introduce you to Adobe Connect and the features that we will use for class.
