

Business Objects Upgrade

The software for the Data Warehouse reporting system, Business Objects, was upgraded the weekend of 11/21/2015. There will be no down time as all Reports have been migrated to the new system and are being updated daily. The new version is available at the following URL:

<https://boeweb.clemson.edu/BOE/BI>

Please begin using the new URL instead of the old link with edwbirpt in the URL. If you have the link bookmarked, please update your bookmark. **The current version will be available for a couple of weeks as Users transition over to the new system.** If you develop any new reports or create shortcuts in the old system, they will not be migrated to the new system after 11/21/2015. Favorites and Inboxes have been migrated, please let us know if you see any that are missing.

The new version of Business Objects looks a little different from the current version. Infoview is now called BI Launchpad. Help sessions have been created and can be viewed by going to the cubs webpage www.clemson.edu/cubs and clicking on "Business Data Warehouse" link on the left side of the page. There is a session showing how to logon and set preferences to show the available reports. There is also a session for viewing, exporting, and printing crystal and webi reports.

If you do not set the preferences to display public folders after login, the initial page is a dashboard where links of commonly viewed reports can be displayed. Also, for Webi developers, the format for developing Webi reports has changed. More training on both of these will be offered in the next few weeks.

If you have any issues or questions, please email dwhhelp-l@clemson.edu
