PeopleSoft:
Hire Transactions
Overview
The process by which a hire is entered into PeopleSoft is dependent on 1) the type of position, 2) whether a job opening was created for the position and 3) the individual’s employment history with Clemson University. This document outlines the steps Human Resources (HR) partners perform to enter various types of hire transactions in PeopleSoft.

Determine the Type of Hire
When a new, existing, or returning faculty or staff member accepts a new position at Clemson University, the HR partner must determine what type of hire entry is appropriate for the individual.

Additional Information: The types of hire entries include:
- Manage Hires
- Add a Person
- Rehires
- Add Employment Instance

Please note: Guidance for processing non-paid workers and promotions/demotions and transfers is available in separate documents. For non-paid workers (contingent workers or persons of interest) see the Processing a Non-Paid Worker user guide. For promotions/demotions and transfers is the Promotions/Demotions and Transfers quick reference.

Manage Hire is the hire type used when a job opening has been created for the position. See the Manage Hires section (page 3) for more information.

- Job openings are generally created for the following position types when the position will be posted and recruited for: faculty or staff full-time equivalent (FTE), time-limited (TLP), temporary-grant (TGP), temporary or intermittent.

Add a Person is the hire type used when a position is not posted and a job opening has not been created. See the Add a Person section (page 16) for more information.

- Add a Person is generally used for a student hire or an employee who is being waived into a position. Add a Person can be used to complete a hire entry for the following types of position when the position was not
posted or recruited for: faculty or staff full-time equivalent (FTE), time-limited (TLP), temporary-grant (TGP), temporary or intermittent.

**Rehire** is the hire type used when the individual being hired into the position has previously worked for Clemson University and a job opening has not been created for the position. See the Rehire section (page 28) for more information. Note: If a job opening has been created, please use Manage Hires to process this hire transaction.

**Add Employment Instance** is the hire type used to add an additional job for an employee who is already employed by Clemson University. See the Add Employee Instance section (page 37) for more information.

- Add Employment Instance is generally used for student employees who are working multiple part-time jobs across several departments.
