**Subject:** Sequestration, the Continuing Resolution, and working "at risk"

Dear Industry Partner,

Due to the uncertainty of the current fiscal climate relative to Sequestration and the Continuing Resolution, the Government must advise our Industrial Partners that no one may work "at risk". In the event sequestration goes into effect on 1 March, there is no expectation that any funding will become available to cover "at risk" work. In the event your contract, or an individual Technical Task Order (TTO) under your contract, runs out of funding - you must stop work and notify your COR and Contracting Officer.

If you have any questions, please contact the Contracting Officer responsible for your contract.

Regards,

The ARC Webmaster
