Clemson Forever is dedicated to strengthening the University by building a solid financial base of private giving, providing exemplary stewardship of those gifts and clearly communicating to donors the impact of their gift and the gratitude of the Clemson Family. To this end, the Will to Lead for Clemson is a $1 billion capital campaign to support students, faculty, engagement and facilities.

The Need

When students come to Clemson University, they expect the best in both academics and campus life. They want a high-quality education from one of the nation’s top 20 public universities and a welcoming environment that facilitates studying, relaxing and forming relationships that will last a lifetime. That’s why Clemson is committed to creating housing and dining spaces that enhance student performance and make campus feel like home away from home.

Although Johnstone Hall and the Edgar A. Brown University Union have served the student body well for decades, the renovation required to bring these buildings up to contemporary standards would not be cost-effective. Instead, a state-of-the-art facility is under construction that will invigorate the center of campus and meet the changing needs of students, faculty, staff and visitors.

Raising the Standard for Campus Life

The Core Campus project is a major new addition to Clemson University campus life with an estimated cost of $96 million. When completed, the 260,000 square foot mixed-use facility will house approximately 700 students and include residential dining as well as retail opportunities. The center will also provide a new home for the Calhoun Honors College.

Here, 400 honors students will live in suite-style rooms with semi-private bathrooms and enjoy public community areas such as a central lounge, study rooms, grand hall, library and classrooms. New administrative space in the facility will house all honors office staff, including the National Scholars and major fellows programs.

In addition, 300 first-and second-year students will live in traditional two-student rooms with multiple single-user bathrooms located centrally on each floor.

Dining facilities will include a 900-seat dining hall and a 300-seat dining center to replace Harcombe Dining Hall, as well as retail food and beverage options and a convenience store. The flexibility of indoor and outdoor dining space offers the Clemson community a multitude of options to connect with each other.

Core Campus is scheduled to open in the fall of 2016.

Support Core Campus

The beautiful campus, world-class research and high quality of life at Clemson are some of the reasons why 92 percent of our seniors say they would choose to be Tigers all over again. As the student body continues to grow and the role of the University in students’ lives continues to change, the dynamic design and construction of Core Campus must reflect Clemson’s vision for the future. Your gift to the Core Campus project will be part of the Will to Lead for Clemson, a $1 billion capital campaign in support of students, faculty, facilities and engaged learning. Help Clemson continue its legacy of putting students first by giving them access to the best campus life.
