Clemson University’s College of Education is a transformative leader in systematically improving education. We train teachers, counselors and leaders for P-12 schools; prepare counselors to serve in communities; train student affairs practitioners, administrators and faculty to serve in higher education; and prepare training and development specialists for business and industry. But we do even more. We engage tomorrow’s educators in high-quality research and professional learning that will help them make a difference in the world.

The College of Education is dedicated to enhancing the education and development of all students, particularly those in underserved communities. We see a significant role for our college in the economic development of our state and nation, and we embrace Clemson’s land-grant mission to better the lives of South Carolina’s citizens. Our mission is vital. When education is improved, poverty and crime are reduced, the workplace and health are enriched and communities are strengthened. We not only shape the lives of individuals, but we also help transform families and communities.

George J. Petersen is the founding dean of the College of Education. An educational leadership expert and former social studies teacher, he previously served as dean of the Graduate School of Education at California Lutheran University. He has also served in academic leadership positions at the University of California-Santa Barbara and the University of Missouri-Columbia. Petersen, who holds a Ph.D. in educational policy, organizations and leadership studies from UC Santa Barbara, is the author or co-author of three books and more than 100 book chapters, articles, research papers, monographs and commissioned reports. His scholarly work largely focuses on the executive leadership of district superintendents.

CALL ME MISTER® (MENTORS INSTRUCTING STUDENTS TOWARD EFFECTIVE ROLE MODELS)
A nationally recognized initiative to increase the pool of available teachers from more diverse backgrounds

DOCTORATE IN EDUCATION: EDUCATION SYSTEMS IMPROVEMENT SCIENCE
Ed.D. program that partners with three regional universities to improve educational settings and student outcomes through systemic whole school reform by researching ongoing critical educational issues in the state (*pending CHE approval)
