"Ableism and Anti-Blackness: An Introduction to Disability Justice"

413 Cooper Library, scholars lab; virtual

This lunch and learn stages a conversation about the shift from disability rights to disability justice movements. Rather than frame disability as — in the words of poet Audre Lorde — a "single issue," disability justice recognizes disability as a raced, gendered and classed category. This session will attend to the overlap between histories of race and disability as they relate to everything from diagnostic practices to the COVID-19 pandemic's impact on people of color. To conclude, we'll discuss the ramifications of the shift from rights-based discourse to justice for the work we do to support disabled students on campus and the disability community more broadly.

Register for [National Disability Employment Awareness Month](#) events.
