In accordance with the Compliance with Health and Safety Directives policy, this document has been developed with the overarching priority of ensuring the health and safety of our students, employees and the surrounding community. Incidents of noncompliance will result in referrals to the Office of Community and Ethical Standards (students), Office of Human Resources (employees) and Procurement Services (contractors).

QUARANTINE
In accordance with CDC recommendations, individuals who are fully vaccinated and have uploaded documented proof of vaccination through the upload tool are no longer required to quarantine while asymptomatic if exposed to a known positive case. Isolation and quarantine procedures will continue for those not vaccinated (or those who have not uploaded vaccination documentation).

Individuals exposed to a known positive must quarantine for ten (10) days. If they remain asymptomatic and test negative on day 6 or 7, individuals can “test out” of quarantine after completing 7 full days of quarantine.

ISOLATION
In accordance with CDC recommendations, upon testing positive individuals must isolate for ten (10) days, regardless of vaccination status. Positive tests not collected through on campus testing must be documented through the upload tool. An evaluation will occur at the end of the ten (10) days to determine the end of isolation and acceptable return to University spaces. For detailed process information click here.
