In accordance with the Compliance with Health and Safety Directives policy, this document has been developed with the overarching priority of ensuring the health and safety of our students, employees and the surrounding community. Incidents of noncompliance will result in referrals to the Office of Community and Ethical Standards (students), Office of Human Resources (employees) and Procurement Services (contractors).

In accordance with CDC recommendations, individuals who are fully vaccinated and have uploaded documented proof of vaccination through the upload tool are no longer required to quarantine while asymptomatic if exposed to a known positive case. Isolation and quarantine procedures will continue for those not vaccinated (or those who have not uploaded vaccination documentation).

Individuals exposed to a known positive must quarantine for seven days. At day seven, if there are no symptoms, individuals can “test out” of quarantine. If the individual continues to test positive at day 7, the quarantine period ends at day 10. Individuals who test positive are exempt from future quarantine for 90 days after their isolation period ends.
