Kronos to require log-in through Duo application

Effective July 21, 2023, Kronos, Clemson’s timekeeping/leave tool, will require single sign-on with two-factor authentication through DUO Mobile to log in. Kronos tracks employees’ worked time, leave requests, and allows supervisors to approve timecards and leave.

DUO offers two-factor authentication (2FA, for short) to ensure that only authorized individuals can access your information.

Several Clemson systems already require single sign-on with 2FA, and this new addition of Kronos will not require any extra steps for individuals who already have the Duo mobile app installed and registered.

If this is your first time using DUO, if you need to reactivate DUO, or if you need to manage your registered devices, please go to CCIT's 2FA Webpage. CCIT also has a “Frequently Asked Questions” page on 2FA with DUO.

Kronos will be temporarily unavailable between 5 and 7 p.m. on July 21. When the system returns online, DUO will be required to access Kronos.
