

COVID-19 Vaccine Information

ON-CAMPUS VACCINATION CLINIC

Vaccines at Clemson University are not required for students, faculty or staff but are strongly encouraged

Students, faculty and staff who would like to receive a free COVID-19 vaccine are welcome to take part in a clinic inside Fike Gymnasium two-court area adjacent to Swann Fitness Center from Monday, Aug. 9 through Saturday, Aug. 14 and from Monday, Aug. 16 through Saturday, Aug. 21. VaxClinic will be offering the Moderna two-dose series for free to interested participants. The clinic will mirror hours for the school's testing site, operating daily from 7 a.m. to 5 p.m. Registration will take place onsite and incentives are available.

COMMON MISCONCEPTIONS

The vaccine will give me COVID-19.	None of the vaccines contain the live virus causing COVID-19.
I do not need to get the vaccine, I already had COVID-19.	People can be infected more than once – vaccines offer better protection without risk of serious illness.
The vaccine will change my DNA.	The vaccine does not contain microchips, it cannot alter your DNA or enter the nucleus of the cell where DNA is.
The COVID-19 vaccine causes infertility.	There is no evidence the vaccine affects reproduction, causing infertility or difficulty with pregnancy.
The COVID-19 vaccine isn't safe.	The vaccine has been developed under the most intense safety monitoring in U.S. history.

350M

COVID vaccine doses have been given in the U.S.

99%

Deaths from COVID since widespread vaccination are unvaccinated individuals.

>10x

Unvaccinated individuals are 10x more likely to be hospitalized from COVID.

WHY GET VACCINATED?

- Create an immune response in your body against the virus.
- Prevent yourself from getting infected and/or severely ill.
- Protect your family, friends and coworkers.
