The Facts

3D printers in office spaces

3D printer use is currently surging around the world and we are seeing it on our campus as well the growth of Makerspace currently having two location on main campus.

Do you have a 3D Printer?
If so, is it registered?

Figure of six of the common different brands/models ands types of 3D printers on the market.

Are you thinking about getting a 3D printer?

Steps to getting and using a new 3D printer:

1. Contact OES for an assessment of the location where the printer will be located.
2. Once the new printer is received and setup, go to SciShield and register the printer.
   - OES 3D Printer Manager can assist with registration process.
3. Contact OES if filament used changes
   - PLA is standard filament, other filaments require OES assessment
