

The use of personal vehicles and public transportation for transport of hazardous materials is **prohibited** at all Clemson University facilities. This includes but is not limited to dry ice, liquid nitrogen, laboratory chemicals, gas cylinders, biological agents, radioactive materials and materials of trade. For guidance and assistance on transporting hazardous materials contact Research Safety at 656-0341.

**IF you Do This**

**You Risk This**

Per state, federal and international regulations, all faculty, staff and students who ship hazardous materials from Clemson University facilities must be trained and certified to do so.

**Clemson University must approve and authorize both the training and certification.**

Research Safety makes it easy to get the required trainings and offers them free of charge to all faculty, staff and students. Please contact the Hazardous Materials Manager to arrange your training for domestic or international hazardous materials
