

Brown Bag Series Spring 2023

The Brown Bag Seminar Series is an opportunity for the Clemson University community to better understand research integrity and research compliance related topics.

These seminars qualify for one hour of advanced RCR training.

January 23, 2023 – Sound, Safe, and Scientific Fieldwork: Contemporary Issues and Best Practices

Fieldwork is an essential element of many scientific disciplines and has distinctive challenges that researchers working in the field must address. In this presentation, fieldwork issues related to student safety, operational leadership, situational awareness, scientific integrity, harassment, and other concerns will be discussed, and best practices for sound, safe, and scientific fieldwork will be proposed.

Presenter – Gary Machlis, PhD; University Professor of Environmental Sustainability

February 27, 2023 – Foreign Influence

Since 2018, federal government agencies have expressed concern that national and economic security may be at risk by the unauthorized sharing of research information with non-US entities. This session will review a researcher's responsibility to disclose all sources of support and collaborations according to revised guidelines for completing current and pending and biosketch documents as part of a federal funding application. Additional information will be provided on anticipated requirements for research security training at all institutions of higher education.

Presenters – Sheila Lischwe, PhD., Director of Sponsored Programs and Rhonda Ryals, Director of Export Compliance and Research Security

Target audience – Faculty, staff, postdocs and students

Location – 12pm-1pm; In Person- 242 LSF OR via Zoom

April 19, 2023 – Are these studies still controversial? Case studies of historically controversial human subjects research

This will be a panel discussion. Panel members will review case studies of research and discuss:

- the ethical issues with the research design and methods;
- if the studies would be considered controversial today;
- if changes are needed with the research design to seek IRB approval under current regulations and policies; and
- the ethical responsibilities of researchers
