HOW TO USE THE CROSSLINKER

1. Turn using the power switch located on the back.
2. Don proper PPE- UV safety glasses, mask (optional), and gloves (optional).
3. Unfold masks to ensure there are no shadowed creases.
4. Open door, place 1-6 masks in the unit, close door.
5. Wash hands after handling masks and after placing the masks in the unit.
6. Press the PRESET button then the ENERGY button. The display will read 1000.0 and both the energy and preset button will be lit.
7. Press START. You will see the light glowing from the window. Wait approximately **2-3 minutes** for the decontamination cycle. The unit will beep 5 times when complete.
8. Open door, flip masks over (ensure there are no creases), close door.
9. Wash hands.
10. To run the second cycle, press START twice. Wait 2-3 minutes and for the machine to beep 5 times.
11. Wash hands and remove decontaminated masks from the chamber.
12. Turn the power switch off.
